Attachments: QAPP_Addendum_2_Inwater_Final_05-07-2021.pdf

Good afternoon, Ravi,

Attached is the final *Terminal 25 Quality Assurance Project Plan Addendum 2: Subsurface Sediment Characterization* for EPA's records.

Based current contractor availability, sampling is anticipated to occur in early October 2021. If the vibracoring contractor (MSS) becomes available sooner, the Port will expedite the sampling and notify EPA of the earlier timeframe.

Thank you,
Julia

Julia Fitts, L.G.

CAUTION – EXTERNAL EMAIL: This email originated from outside of Anchor QEA. Please exercise caution with links and attachments.

Julia EPA has reviewed the QAPP Addendum and has found only one error/typo that requires correction (indicated in the attached version). Otherwise, the sampling plan is acceptable and sampling can proceed as scheduled. Please send EPA more information regarding the field schedule for completion of the sampling and a final QAPP for EPA's records.

Thanks

Ravi

Subject: T25 QAPP Addendum 2 - Subsurface Sediment Characterization

Good afternoon, Ravi and Erika,

On behalf of the Port of Seattle, attached is the Terminal 25 Quality Assurance Project Plan Addendum 2: Subsurface Sediment Characterization. This QAPP Addendum 2 describes the proposed second phase of in-water field investigations at Terminal 25 South to support the habitat restoration project.

We have revised the attached QAPP Addendum to address EPA's verbal comments from our meeting on March 10, 2021.

Please let us know if you have any additional comments or questions.

Thanks,
Julia
